

Viruses:

1. Know what makes them up vs. a cell
2. Know how they reproduce
 - a. Know there are 2 phases of reproduction
 - b. Know what they need to reproduce
3. Know how they can come in different shapes and therefore have different types of targets
4. Know how they can latch onto cells (Honors)

If you can answer these without hesitation, you're ready for the quiz! Please refer to the notes on my website and the activities we did in class.

Thanks! Good luck!
